SUMMARY

Third-year Engineering Student specializing in Software Development, passionate about building scalable, efficient, and user-centric applications. Adept at full-stack development, agile methodologies, and cross-functional collaboration to deliver impactful solutions. Proven ability to learn quickly, adapt to dynamic environments, and apply modern tools and frameworks to solve real-world problems.

TECHNICAL SKILLS

Python, Java, C/C++, JavaScript	HTML, CSS, React.js, Node.js	GitHub, CI/CD, AWS, Azure (AZ-900)	MySQL, MongoDB Docker (basic), Kubernetes (basic),
--	---------------------------------------	---	---

PROJECTS

STRESS LEVEL ANALYZER

- Developed a web-based application to analyze and classify user stress levels.
- Used a 40-question CBT (Cognitive Behavioral Therapy) based questionnaire to collect user input.
- Implemented a machine learning model to predict stress levels as Low, Moderate, or High.
- Integrated Streamlit for an interactive and user-friendly web interface.
- Added login/signup authentication with proper form validation

QUERY GENIE

- Built a real-time chat application that allows users to communicate through a web interface.
- Used React.js for responsive and dynamic front-end development.
- Developed backend in Python using FastAPI to handle message processing and API requests.

EDUCATION

A.P. SHAH INSTITUTE OF TECHNOLOGY Aug 2023- 2027

University of Mumbai
B.E in Information Technology
